Schedule 2 Export Policy

Section XV, BASE METALS AND ARTICLES OF BASE METAL

Main Notes			
Sl.No.	Notes	Notification No.	Notification Date
1	This Section does not cover : (a) prepared paints, inks or other products with a basis of metallic flakes or powder (headings 3207 to 3210, 3212, 3213 or 3215); (b) ferro-cerium or other pyrophoric alloys(heading 3606); (c) headgear or parts thereof of heading 6506 or 6507; (d) umbrella frames or other articles of heading 6603; (e) goods of Chapter 71 (for example, precious metal alloys, base metal clad with precious metal, imitation jewellery); (f) articles of Section XVI (machinery, mechanical appliances and electrical goods); (g) assembled railway or tramway track (heading 8608) or other articles of Section XVII (vehicles, ships and boats, aircraft); (h) instruments or apparatus of Section XVIII, including clock or watch springs; (ij) lead shot prepared for ammunition (heading 9306) or other articles of Section XIX (arms and ammunition); (k) articles of Chapter 94 (for example, furniture, mattress supports, luminaires and lighting fittings, illuminated signs, prefabricated buildings); (l) articles of Chapter 95 (for example, toys, games, sports requisites); (m) hand sieves, buttons, pens, pencil-holders, pen nibs, monopods, bipods, tripods and similar articles or other articles of Chapter 96 (miscellaneous manufactured articles); or"""" (n) articles of Chapter 97 (for example, works of art).		
2	Throughout this Schedule, the expression """"parts of general use"""" means : (a) articles of heading 7307, 7312, 7315, 7317 or 7318 and similar articles of other base metal, other than articles specially designed for use exclusively in implants in medical, surgical, dental or veterinary sciences (heading 9021); (b) springs and leaves for springs, of base metal, other than clock or watch springs (heading 9114); and (c) articles of headings 8301, 8302, 8308, 8310 and frames and mirrors, of base metal, of heading 8306. In Chapters 73 to 76 and 78 to 82 (but not in heading 7315) references to parts of goods do not include references to parts of general use as defined above. Subject to the preceding paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.		

3	Throughout this Schedule, the expression ""base metals"" means : iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium),rhenium and thallium.		
4	Throughout this Schedule, the term "cermets" means products containing a microscopic heterogenous combination of a metallic component and a ceramic component. The term "cermets" includes sintered metal carbides (metal carbides sintered with a metal).		
5	Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74) : (a) an alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals; (b) an alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present; (c) in this Section, the term ""alloys"" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.		
6	Unless the context otherwise requires, any reference in this Schedule to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.		
7	Classification of composite articles: Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the General Interpretive Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose: (a) iron and steel, or different kinds of iron or steel, are regarded as one and the same metal; (b) an alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and (c) a cermet of heading 8113 is regarded as a single base metal.		
8	In this Section, the following expressions have the meanings hereby assigned to them : (a) waste and scrap: (i) all metal waste and scrap; (ii) metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons. (b) Powders: products of which 90% or more by weight passes through a sieve having a mesh aperture of 1 mm.		
9	For the purposes of Chapters 74 to 76 and 78 to 81, the following expressions shall have the meanings hereby assigned to them: (a) Bars and rods: Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the		

shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings. Wirebars and billets of Chapter 74 with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 7403. This provision applies mutatis mutandis to the products of Chapter 81. (b) Profiles: Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings. (c) Wire: Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. (d) Plates, sheets, strip and foil: Flat-surfaced products (other than the unwrought products of heading 8001), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are: - of rectangular (including square) shape with a thickness not exceeding one-tenth of the width; - of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings. Headings for plates, sheets, strip, and foil apply, inter alia, to plates, sheets, strip, and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings. (e) Tubes and pipes: Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex

	polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer crosssections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Chapter 74 Copper And Articles Thereof.

Main Notes																													
Sl.No.	Notes	Notification Date	Notification No																										
1	In this Chapter, the following expressions have the meanings hereby assigned to them: (a) Refined copper: Metal containing at least 99.85 per cent. by weight of copper; or Metal containing at least 97.5 per cent. by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following Table : TABLE ? OTHER ELEMENTS <table><tr><th>Element</th><th>Limiting content % by weight</th></tr><tr><td>Ag Silver</td><td>0.25</td></tr><tr><td>As Arsenic</td><td>0.5</td></tr><tr><td>Cd Cadmium</td><td>1.3</td></tr><tr><td>Cr Chromium</td><td>1.4</td></tr><tr><td>Mg Magnesium</td><td>0.8</td></tr><tr><td>Pb Lead</td><td>1.5</td></tr><tr><td>S Sulphur</td><td>0.7</td></tr><tr><td>Sn Tin</td><td>0.8</td></tr><tr><td>Te Tellurium</td><td>0.8</td></tr><tr><td>Zn Zinc</td><td>1.0</td></tr><tr><td>Zr Zirconium</td><td>0.3</td></tr><tr><td>Other elements *</td><td>each 0.3</td></tr></table> * Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si. (b) Copper alloys: Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that : (i) the content byweight of at least one of the other elementsis greater than the limitspecified in the foregoing table; or (ii) the total content by weight of such other elements exceeds 2.5 per cent. (c) Master alloys: Alloys containing with other elements more than 10 per cent by weight, of copper not usefully malleable and commonly used as an additive in the manufacture of other alloys or as deoxidants, de-sulphuring agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorous falls in heading 2853. 1	In this Chapter the following expressions have the meanings hereby assigned to them: (a) Copper-zinc base alloys (brasses) Alloys of copper and zinc, with or without other elements. When other elements are present: (i) zinc predominates by weight over each of such other elements; (ii) any nickel content by weight is less than 5%. [see copper-nickel-zinc alloys (nickel silvers)]; and (iii) any tin content by weight is less than 3%. [see copper-tin alloys (bronzes)]. (b) Copper-tin base alloys (bronzes) Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3% or more the zinc content by weight may exceed that of tin but must be less than 10%. (c) Copper-nickel-zinc base alloys (nickel silvers) Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5% or more by weight [see copper-zinc alloys (brasses)]. (d) Copper-nickel base alloys Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1% of zinc. When other elements are present, nickel predominates by weight over each of such other elements.
